Brentwood	Contra Costa	Road Maintenance & Rehabilitation	Pavement Management Program - 2019	This project will consist of pavement condition surveying of roadways every two years and then reconstructing, overlaying, surface sealing and crack sealing various roads each year as needed. The City's pavement management software selects those streets on which it is the most cost effective to perform preventative maintenance with field verification by staff. Constructing roadways is a significant investment for the City. Preventative maintenance is the best means for keeping this large investment in good, operable condition and avoids costly reconstruction.	The City of Brentwood currently maintains: 192 Miles of Streets, 5,957 Street Lights, 65 Traffic Signals, 9,416 Traffic Signs, 150 acres of weed abatement	05/2019	08/2019	7	15	11	7
Brentwood	Contra Costa	Road Maintenance & Rehabilitation	Pavement Management Program - 2018 (17/18 Ongoing)	This project will consist of pavement condition surveying of roadways every two years and then reconstructing, overlaying, surface sealing and crack sealing various roads each year as needed. The City's pavement management software selects those streets on which it is the most cost effective to perform preventative maintenance with field verification by staff. Moraga	Contra Costa	Road Maintenance & Rehabilitation	2018 Joint Moraga-Orinda Full Depth Reclamation	The type of rehabilitation chosen for this year's pavement rehabilitation project will be Full Depth Reclamation (FDR), a technique that pulverizes the existing asphalt pavement and underlying base material and blends it with cement to create a reconstructed roadway base with superior strength. This eco-friendly method efficiently utilizes existing materials, with lessened needs for virgin materials and off haul/delivery trucking. The roadway will receive a top overlay of Rubberized Hot Mix Asphalt (RHMA) as a wearing surface, a product that incorporates recycled rubber from tires, and thereby provides the environmental benefit of diverting tires from landfills. The streets selected --with the length and area to be rehabilitated -- are listed under "Project Location".	On April 11th, 2018, The Moraga Town Council approved Resolution 19-2018, appropriating $278,728 of RMRA funds to the Town's annual Pavement Management Program for this summer's pavement rehabilitation project. This total is in addition to the $93,300 appropriated in October 2017 for the same project, which will span two fiscal years (2017/2018 and 2018/2019), with the specific portions of the project funded, by year, as follows: Tharp Drive (Redfield Place to Springfield Place), 430 linear feet / 14,190 Square feet, FY 2018/19 Tharp Drive (Springfield Place to Deerfield Drive), 635 linear feet / 20,955 Square feet, FY 2018/19 Tharp Drive (Deerfield Drive to Butterfield Place), 355 linear feet / 11,715 Square feet, FY 2017/18	04/2018	10/2018	20	20	16	7

Pasadena	Los Angeles	Road Maintenance & Rehabilitation	Resurfacing and Slurry Seal FY 2017 - 2019	This project will resurface 1.7 miles of City of Pasadena streets utilizing rubberized asphalt. This method is a noise reducing pavement material that consists of regular asphalt concrete mixed with crumb rubber made from recycled tires. This sustainable paving practice diverts tires from the waste stream. The project has the capacity to divert over 5,800 tires from landfills, while also reducing noise, resisting cracking, lasting longer, providing better skid resistance, retaining a dark color longer, and providing contrast to pavement markings. Fort Bragg	Mendocino	Road Maintenance & Rehabilitation	Street and Alley Pavement Maintenance	When small localized areas of pavement are found to be in poor condition they are treated with small scale pavement repair. Small scale pavement repair must be done in a timely fashion; as potholes grow and allow water intrusion which leads to more large scale deterioration of the pavement. Surface patching and crack sealing are the two primary intermediary actions taken to conserve the existing conditions of pavement. Pothole patching is the most common local technique, done by milling a portion of the pavement to a depth that removes all deteriorated material and then the pothole is filled with asphalt and compacted. The goal of this project is to prevent the local/residential streets and alleys with low PCI's from deteriorating into an un-usable state as these street categories often go unselected for full treatment due to the algorithm used to by the Pavement Management Program. Fort Bragg	Mendocino	Traffic Control Devices	Crosswalk and Street Marking	Centerline, fog line, bicycle lane, and crosswalk markings provide cost-effective roadway guidance that helps reduce crashes and supplement other traffic control devices such as sign and signals. The city's existing pavement markings need replacing in many locations; these will be replaced by thermoplastic and raised pavement markers. This year nine streets have been identified for such work. The street striping project will replace all white and yellow line markings, decals, raised markers, and word pavement markings on approximately 3.5 miles of streets. The selected streets include arterials, collectors, and safe routes to school. The standards for the application of markings and delineation are set forth in the California Manual on Uniform Traffic Control Devices (MUTCD). The unfunded balance for this project will be covered with local street sales tax dollars. Mission Viejo	Orange	Road Maintenance & Rehabilitation	Residential Resurfacing	The City of Mission Viejo has established seven, distinct geographic areas to conduct the resurfacing of public residential streets in the City. Each year, one of the seven areas is budgeted as a capital improvement project (CIP) for public residential streets resurfacing. The program operates on a rotating, seven-year cycle. In FY 2018-19, Residential Resurfacing Area 7 is scheduled for residential street resurfacing. This project will resurface, with overlay and slurry seal treatments, 62.63 lane miles of public residential streets in Area 7. There are 166 public residential streets in Area 7. The purpose of the City of Mission Viejo seven-year residential resurfacing program is to regularly maintain and improve the pavement condition of the City's residential public streets. The seven-year cycle achieves a maximum useful life of the pavement treatments, to prevent the streets from degrading into more expensive pavement conditions that would require more expensive resurfacing treatments.	Public residential streets in Residential Resurfacing Area 7, which is bounded by Los Alisos Boulevard to the north, La Paz Road to the south, the City of Mission Viejo jurisdictional boundary to the east, and Marguerite Parkway to the west, in the City of Mission Viejo.	07/2018	11/2018	7	20	73	36
Mission Viejo	Orange	Road Maintenance & Rehabilitation	Felipe Road/Olympiad Road Arterial Resurfacing	In Fiscal Year 2018-19, the arterial streets of Felipe Road and Olympiad Road in the City of Mission Viejo will be resurfaced with overlay treatment. The resurfacing project will overlay 14.54 lane miles of arterial streets, and will tackle pavement conditions on roadway segments along Felipe Road and Olympiad Road which have been classified as "fair" and "good" in a preliminary 2018 Citywide Pavement Management Program Update.	On Olympiad Road, from Alicia Parkway south to Jeronimo Road; and, on Felipe Road, from La Paz Road south to Marguerite Parkway, in the City of Mission Viejo.	06/2019	10/2019	15	20	73	36

Newport Beach	Orange	Road Maintenance & Rehabilitation	San Joaquin Hills Road Pavement Rehabilitation	This project involves coldmilling and overlaying the existing asphalt concrete pavement with rubberized asphalt concrete. Deteriorated concrete improvements will also be reconstructed. Impacted utilities will be adjusted to grade. The new pavement will also be restriped. Final design is scheduled to be completed by Summer of 2019 and construction will be completed by Winter 2020. The estimated useful life of this project is 15 years minimum.	This project is located on San Joaquin Hills Road from Jamboree Road to MacArthur Boulevard .	08/2019	12/2020	15	20	74	37
Orange	Orange	Road Maintenance & Rehabilitation	Pavement Rehabilitation FY 18/19	The Pavement Rehabilitation Project will maintain and rehabilitate approximately 18 Streets for a total of 25,270 linear feet for a total of 1,385,335 square feet of pavement. The construction activities will consist of slurry seal, cold planning, and overlay operations. In addition to the pavement rehabilitation the City will improve access ramps within the project limits along with other construction activities related to pavement rehab such as, adjusting valve boxes, manhole rings, crack sealant, and striping.	1.Burton Avenue From West End To Chouteau Street 2.Chouteau Street From Emerson Avenue To Burton Avenue 3.Chouteau Street From Buckeyewood Avenue To South End 4.Cleveland Street From Meats Avenue To Del Mar Avenue 5.Del Mar Avenue From Cleveland Street To Chouteau Street 6.Del Mar Avenue From Chouteau Street To Cambridge Street 7.El Sereno Drive From Santiago Boulevard To Riding Way 8.Emerson Avenue From Pine Street To Chouteau Street 9.Gates Avenue From Cleveland Street To East End 10.Genesse Street From North End To Grove Avenue 11.Genesse Street From North End To Del Mar Avenue 12.Keokuk Street From North End To Grove Avenue 13.Namuria Street From North End To Grove Avenue 14.Pine Street From Meats Avenue To Emerson Avenue 15.Ridgewood Street From Buckeyewood Avenue To South End 16.Shaffer Street From Meats Avenue To Buckeyewood Avenue 17.Shaffer Street From Buckeyewood Avenue To Taft Avenue 18.Winlock Street From Buckeyewood Avenue To South End 19.Woodside Street From Buckeyewood Avenue To South End 20.Chapman Ave From Newport Boulevard To Trails End Lane 21.Chapman Ave From Trails End Lane To Jamboree Road 22.Meats Avenue From 280' W/0 Feather Hill To Summitridge Lane 23.Meats Avenue From Summitridge Lane To Marywood Drive 24.Meats Avenue From Marywood Drive To Via Escola 25."Meats Avenue From Via Escola To 1065' N/O Via Escola (City Limit)" 26.Newport Boulevard From White Oak Ridge To Chapman Ave 27.Newport Boulevard From Chapman Avenue To Santiago Canyon Road 28.Taft Avenue From Tustin Avenue To Sacramento Street 29.Taft Avenue From Sacramento Street To Fern Street 30.Taft Avenue From Fern Street To Santiago Boulevard 31.Tustin Street From 400' S/O Lincoln Avenue To 150' N/O Heim Avenue	05/2019	12/2019	10	15	68	37
Placentia	Orange	Road Maintenance & Rehabilitation	FY 2018-19 Street Resurfacing Project Phase 1	This project will rehabilitate 191,000 square feet of residential streets utilizing central plant recycling in lieu of a traditional reconstruction project. This method will allow the City to recycle the existing pavement and aggregate in order to reconstruct the roadway. This methodology will save money as well as reduce greenhouse gas emissions. If successful, the City will employ pavement recycling projects in future road rehabilitation efforts.	See attached map. Rocklin	Placer	Road Maintenance & Rehabilitation	Traffic Signal ITS	Acquire consultant through RFP process to study Rocklin's gaps in transportation infrastructure, and identify technologies to enhance Rocklin's safety and drivability. As past and forecasted future performance of investments continue to influence project decisions, the ability for Rocklin to implement systems to collect the data that can be used to generate measurable/comparable performance indicators will be critical. With an ITS Master Plan, Rocklin should have the ability to develop and evaluate mitigation measures for peak hour traffic congestion.	Rocklin and adjacent agencies	06/2018	06/2020	25	30	4	1
Rocklin	Placer	Road Maintenance & Rehabilitation	Citywide Dig Outs (17/18 Carryover)	The removing and replacing of degraded asphalt needs to be done as part of general repairs and is necessary to preserve the roadways and prevent major rehabilitation in the coming years. Rocklin	Placer	Road Maintenance & Rehabilitation	Pacific Street Roundabout	Replace existing signalized intersection with a multilane roundabout, new pavement, and street lighting system. Current LOS is unacceptable due to the addition of new developments, i.e. Rocklin Commons and other developments in the vicinity along Granite Drive. Replacing the signals will lead to an acceptable LOS and reduced traffic conflicts. Rocklin Road pavement is deteriorated and has had no structural overlays in the last 10 years.	Pacific Street at Rocklin Road	12/2018	06/2019	17	20	4	1
Rocklin	Placer	Road Maintenance & Rehabilitation	Partial Road Reconstruction of Rocklin Ranch Industrial Park	Partial road reconstruction and resurfacing of the Rocklin Ranch Industrial Park. This is an industrial area and has a lot of regular and heavy vehicular traffic. The amount of traffic has increased over time causing the streets to become fatigued and susceptible to water damage. Rocklin	Placer	Road Maintenance & Rehabilitation	Sunset Blvd. and Springview Intersection Upgrade	Lane extension and gutter redesign and construction. Existing conditions cause delays for the left turn lane from Sunset Blvd. to 3rd Street. By extending the turn lane, it will free the straight movement through the intersection, and by removing the valley gutter and constructing a smoother transition onto 3rd Street, traffic will not have to slow for the bump, and will proceed normally through the intersection. This will result in fewer delays for drivers using the traffic signal and will sustain a steady flow of traffic in a safe and secure manner.	Intersection of Sunset Blvd. and Springview Drive	12/2018	06/2019	17	20	4	1
Roseville	Placer	Road Maintenance & Rehabilitation	2019 Residential Resurfacing Project	The project includes the removal and replacement of failed asphalt concrete roadway sections and the application of a preventative maintenance surface treatment. The maintenance surface treatment will provide a waterproof membrane to protect the existing asphalt surfaces and extend the life of the underlying pavement.	The work will occur along various residential streets within the Woodcreek Oaks, Foothills Junction, Los Cerritos, Roseville Heights, South Cirby, and Maidu neighborhoods.	05/2019	10/2019	7	10	6	1, 4

Riverside	Riverside	Other	2018-2019 SB-1 Maintenance and Traffic Improvements	The Road Maintenance and Rehabilitation Project will consist of resurfacing 4.19 miles of Arterial and 2.29 miles of Local roads to provide a safer and quieter street network system; existing concrete sidewalk, curb/gutter, and driveways will be rehabilitated to eliminate tripping hazards; and pedestrian ramps will be improved to the current ADA standards. The Traffic Signal Installation projects will makes it easier for pedestrians, bicyclists, motorists, and public transit to enter the intersection. Traffic signals reduce overall intersection delay and in general reduce emissions and congestion. Pedestrian Scramble Improvement projects will modify the traffic cycles and install new diagonal crosswalks to temporarily stop all vehicular traffic and allow pedestrian movements in all directions including diagonally. Pedestrian scrambles safeguard pedestrian crossings, encourage active transportation, and would better serve the numerous special events held in the Downtown area. The Pedestrian HAWK Signal Installation project will benefit John W. North High School. The HAWK signal system would improve pedestrian crossings and would encourage parents to use Trade Center Drive as an alternate drop off and pickup location. The HAWK signal is a pedestrian beacon designed to stop traffic flow to allow pedestrians to cross safely. Poway	San Diego	Road Maintenance & Rehabilitation	FY 18/19 Street Maintenance Project	The FY 18/19 Street Maintenance Project will provide deep patching, skin patching, slurry sealing, utility lid raise to grade, and restriping for all of the streets in City of Poway street maintenance zone 1. This project includes 86 streets totaling approximately 20 centerline miles and approximately 5 million square feet of road surface. The project will greatly extend the life of these streets, and will include restriping with complete street striping features including continental crosswalk striping and the addition of bike lane buffers.	This project includes all of the streets in street maintenance zone 1, which includes 86 streets and approximately 20 center line miles. Zone 1 includes Espola Road from the west city limits to Sandhill Road, and includes all public streets north and east of Espola Road within these limits. The project also includes streets on the south and east sides of Espola Road in the Summerfield Estates and Bridlewood Neighborhoods.	07/2018	09/2018	15	20	77	38
San Diego	San Diego	Road Maintenance & Rehabilitation	Slurry Seal Group 1804 - Option Renewal (1804B)	This project involves the application of a slurry seal on approximately 60 miles of roads throughout the city. Slurry seal is generally used on streets which are in good condition to protect them from deterioration. The application of a slurry seal, which consists of sand, emulsion and water applied in a thin layer up to 3/8 of an inch thick on a street surface, can protect and preserve the street pavement for approximately 3-7 years. Solana Beach	San Diego	Road Maintenance & Rehabilitation	2018/19 Annual Pavement Maintenance Project	The City's SB1 funds will be added to the annual pavement repair project so more streets could be repaired. As part of this project, it is estimated that 2" overlays will be placed on 425,000 square feet of roads and slurry seals will be placed on approximately 220,000 square feet of roads. A copy of the tentative street list is attached.	Since Solana Beach is only four square miles in size, each year, work typically covers all quadrants and most neighborhoods. The quadrants are determined by two main roads that bisect the City. These roads are Interstate 5 running north/south and Lomas Santa Fe Drive running east/west. Some of the main streets that are included in this project include Cliff Street from North Cedros Avenue to Rios Avenue; South Sierra Avenue from Border Street to Dahlia Drive; Seabright Lane – entire street; South Cedros Avenue from Marsolan Avenue to Cofair Avenue; South Granados Avenue from Palmitas Avenue to the southern end; and Santa Rosita from Santa Helena to Santa Florencia. In summary, this project will include four streets in the Northwest quadrant of the City, seven streets in the southwest quadrant, eight streets in the northeast project and two streets in the southeast quadrant.	05/2018	12/2018	15	25	78	39

Hillsborough	San Mateo	Road Maintenance & Rehabilitation	2019 Street Resurfacing Project	The 2019 Street Resurfacing Project consists of street resurfacing and rehabilitation work for approximately 53 miles of rubberized asphalt overlay, asphalt overlay, cape seal, microsurfacing, and crack sealing. The primary factor for choosing the roadway segments included for rehabilitation is the Pavement Condition Index (PCI) of each roadway. PCI is a measure of a street's condition derived through field inspections that utilize scoring criteria developed by the Metropolitan Transportation Commission's (MTC) pavement management program. Field inspections were conducted in fall of 2018, and the roads with the lowest PCI rating were included in this project and will increase the Town's overall PCI. The improvement of the PCI will help to eliminate the need for vehicles to slow, swerve, or stop suddenly to avoid hazardous road conditions. Properly maintained streets also help to improve traffic flow and assist in preventing congestion, slow traffic, and generally unsafe driving conditions. The Town plans to continue to utilize ,where appropriate, recycled Rubberized Asphalt Concrete (RAC) to help reduce the accumulation of disposed tires occupying landfills in the State of California. The RAC also provides a smoother and quieter roadway surface than conventional asphalt and offers a better platform for outdoor activities such as cyclying and running, which in turn promotes the overall health of the community. Location of the Project: Selected streets are located in various areas within the Town's limit. Detailed locations of each street are summarized in Appendix A. Schedule of Completion: The project is expected to complete by September 2019. Estimated Useful Life: Current life expectancies of proposed streets are shown in Appendix A. Resurfacing and rehabilitation work will extend life expectancy of the these streets as shown below: 2" Mill and AC Overlay - 20 to 30 years 2" RAC Overly - 8 to 15 years 2" AC Overlay - 8 to 15 years Cape Seal - 6 to 8 years Microsurfacing - 4 to 6 years	Selected streets are located in various areas within the Town's limit. Detailed locations of each street are summarized in the project list attached.	05/2019	09/2019	4	30	22	13

Santa Maria	Santa Barbara	Road Maintenance & Rehabilitation	2018 Chip Seal Project	This project consists of placing a chip seal surface treatment and install pavement markings on various City streets in the City of Santa Maria. Chip seal is a preventive maintenance treatment for giving added life to pavement. It represents an important part of the City's annual street maintenance program because it "rejuvenates" the asphalt concrete pavement structure by replacing oil that has evaporated, worn away, or been lost to the elements. The project will provide a surface treatment for approximately 4,000,000 SF of roads.	Various Street throughout the City, some of which include: E. Alvin Avenue east of Suey Road, E. Donovan Road from Broadway to College Drive, N. Railroad Avenue from Canal to Atlantic, S. Miller Street from Main to Camino Colegio, S. Miller Street from McCoy to Orcutt Expressway, Santa Maria Way from Broadway to the City Limits, West Battles Road from Blosser to A Street.	09/2018	12/2018	5	10	35	19
Santa Maria	Santa Barbara	Road Maintenance & Rehabilitation	East Alvin Avenue and South College Drive Pavement Rehabilitation	This project will place a standard 2-inch asphalt overlay over two (2) distressed street sections. Work will include digging out and repairing failed pavement areas with new hot mix asphalt concrete. It will include grinding down the surface of the roadways to allow for an even transition from the overlaid roadway to the roadway edge. Then a glass grid will be placed followed by the hot mix asphalt. The project also includes installation of new striping and pavement markings. Approximately 165,000 SF of roadway, equivalent to 2 lane miles, will be renewed.	East Alvin Avenue from College Drive to Bradley Drive; South College Drive from Stowell Road to Enos Drive	09/2018	12/2018	15	25	35	19
Santa Maria	Santa Barbara	Road Maintenance & Rehabilitation	Thin Maintenance Overlay (2017/18)	This project will place a rubberized asphalt overlay approximately 1.25" thick over five (5) existing roadways. The work involves grinding down the edges of the roadways to allow for an even transition from the overlaid roadway and the roadway edge. Once the overlay is complete, the roadway striping will be replaced. This project will resurface five (5) severely distressed roadways accounting for 364,000 square feet or the equivalent of 4-5 lane miles.	E. Cypress Street from S. Nicholson Avenue to S. Stratford Avenue, E. Cypress Street from S. Palisade Drive to S. Suey Road, N. Valerie Street from E. Main Street to E. Alvin Avenue, N. Palisade Drive from N. Valerie Street to E. Alvin Avenue, N. Lincoln Street from W. El Camino Street to W. Bunny Avenue, and W. Pershing Street from S. Blosser Road to S. Western Avenue.	05/2018	06/2018	7	15	35	19

Agency Name	County	Project Type	Title	Description	Location	Est. Project Start	Est. Project Completion	Est Useful Life Min	Est Useful Life Max	Assembly Districts	Senate Districts
Rohnert Park	Sonoma	Road Maintenance & Rehabilitation	2019-2022 Pavement Management (Cape Seal Project)	Pavement preservation treatments including small areas of pavement repair (i.e. "digouts") and cape seal application (i.e. a combination of chip seal and thin slurry seal) . Cape seals are used when the pavement deterioration is greater than what a slurry seal or microsurfacing is designed to correct, yet the pavement has not deteriorated to the point of requiring an expensive asphalt overlay. A cape seal prevents water penetration, reducing subsequent damage to the road bed, along with providing a new wearing surface.	Country Club Drive between Rohnert Park Expressway and Eleanor Avenue; Golf Course Drive between Country Club Drive and Hillview Way; Snyder Lane between Golf Course Drive and Moura Lane	08/2018	06/2019	6	10	4	3
Rohnert Park	Sonoma	Road Maintenance & Rehabilitation	2019-2022 Pavement Management (Asphalt Overlay)	Asphalt overlay, which is a new pavement section (generally 1.5″ – 2″ thick) placed over the top of an existing pavement surface.	Country Club Drive between Eleanor Avenue and Ellen Street; Southwest Boulevard between College View Drive and Adrian Drive	08/2018	06/2019	12	17	4	3
Rohnert Park	Sonoma	Traffic Control Devices	Traffic Signals System Needs Implementation Project (17/18 Carryover)	Implementation of a central traffic management system, including interconnect media, local intersection hardware, and central system software and hardware	Golf Course Drive, Redwood Drive, Rohnert Park Expressway, Commerce Boulevard, Snyder Lane, East Cotati Avenue	06/2018	06/2019	10	15	4	3
Santa Rosa	Sonoma	Road Maintenance & Rehabilitation	Fulton Road Reconstruction - Occidental Road to W 3rd Street (17/18 Carryover)	This project will reconstruct Fulton Road between Occidental Road and W. 3rd Street using roller compacted concrete technology, updating pedestrian ramps to current ADA standards and maintaining existing Class II Bicycle lanes.	Fulton Road between Occidental Road and W. 3rd Street	04/2018	04/2019	20	20	2, 10	2
Santa Rosa	Sonoma	Road Maintenance & Rehabilitation	Pacific Avenue - Montecito Avenue to Humboldt Street (reconstruction/pavement rehabilitation)	The project will reconstruct Pacific Avenue between Montecito Avenue and Humboldt Street which involves removing the entire pavement section and replacing it with new asphalt concrete and underlying aggregate base to restore its life and serviceability. The project will also include upgrading pedestrian curb ramps to meet current state and federal accessibility standards. The reconstructed roadway will enhance the surface by replacing failing pavement and reduce ongoing maintenance costs. The estimated useful life of the planned pavement rehabilitation is expected to be 20 years.	Pacific Avenue - Montecito Avenue to Humboldt Street (reconstruction/pavement rehabilitation)	07/2018	12/2020	10	20	2	2
Santa Rosa	Sonoma	Other	Sonoma Marin Area Rail Transit (SMART) Hearn Multi-Use Path (MUP) Crossing	The SMART Hearn Multi-Use Crossing is located at Hearn Avenue and the SMART railroad tracks. The project will connect two existing segments of the SMART Multi-Use path (MUP) in southwest Santa Rosa. The proposed signalized street connection will create an enhanced crossing at Hearn Avenue for bicyclists and pedestrians using the multi-use path along the SMART rail corridor. The project will design and install a signalized crosswalk at the SMART MUP intersecting with Hearn Avenue. In addition, the project will include construction of ADA curb ramps on each side of the street, minor modifications to the sidewalk, curb and gutter, and modification of the concrete median in Hearn Avenue to accommodate the pathway, signage and pavement markings. The estimated useful life of the planned pavement rehabilitation is expected to be 20 years.	Hearn Avenue and the SMART railroad tracks.	05/2017	06/2019	10	20	10	2

Davis	Yolo	Complete Streets Components	Tim Spencer Alley Reconstruction 17/18 Carryover	Tim Spencer Alley, located between F and G and connecting Second and Third, has been in disrepair for several years. The sanitary sewer and the water mains are aging beyond repair and need replacing. Additionally the alley surface is damaged and does not flow properly. This project will replace the sewer and water mains and reconstruct the alley surface. The new development at 239 G Street desires a surface treatment similar to their property for a length near Third Street, along their property and will fund that portion of the project. Construction will have to be carefully implemented to minimize the businesses that use the alley for sewer, water, vehicle deliveries, etc.	Tim Spencer Alley - the Alley between F Street and G Street from Second Street to Third Street	03/2018	03/2019	18	20	4	3
