Department Information

The California Transportation Commission (Commission) is responsible for programming and allocating transportation funds used in the construction of highway, intercity passenger rail, active transportation, aeronautics, and transit improvements.

Job Description and Duties

Under the general direction of a Principal Transportation Engineer, the Supervising Transportation Engineer is responsible for implementing the Commission's enhanced program oversight responsibilities and engineering analysis for the State Highway Operation and Protection Program (SHOPP) and Asset Management Plan (AMP). Possession of a valid certificate of registration as a civil engineer issued by the California State Board of Registration for Professional Engineers is required.

The SHOPP is a four-year \$10 billion program of projects that rehabilitate and reconstruct the state's critical highway infrastructure, a system comprised of approximately 50,000 lane-miles of pavement, 13,000 bridge structures, 200,000 culverts and 17 other associated assets. The AMP is a strategic and systemic process of operating, maintaining and upgrading physical assets effectively through their lifecycle by focusing on business and engineering practices for resource allocation and utilization based on well-defined objectives.

Position responsibilities include oversight and Commission action recommendations on the AMP, the Ten-Year SHOPP Plan, and the Four-Year SHOPP program. The position ensures SHOPP projects are consistent with statewide priorities and performance objectives as established in the Commission-approved AMP and that all projects are compliant with state and federal statutory requirements.
