

December 14, 2009

Updated Language:

10. Page 69: Only the first sentence under the header, “Social Equity/ Environmental Justice Issues,” relates to the section in which it has been placed, “4.2 Participation Plan.” The RTP Guidelines subcommittee should seek recommendations from community outreach organizations on best practices for effectively including lower income people in the RTP development process. These recommendations can then be added to this section.

The remaining text under the Social Equity/ Environmental Justice header needs substantial revision and should be moved out of the Participation Plan section. After discussing the placement of this text with the subcommittee, we will submit a suggested location(s) and more specific revisions to the language itself.
