El Dorado County	Fallen Leaf Road - Repairs	Fallen Leaf Road repairs project consist of replacing approximately 290 lineal feet of corrugated metal pipe (CMP) over 8 locations with 18" and 24" High Density Polyethylene (HDPE) pipes. The existing CMPs on Fallen Leaf Road are undersized per current County standards and failing as a result of the 2017 severe winter storms. If these culverts are not replaced the County will continue to have damage to Fallen Leaf Road with each future event. In addition to the culvert work, 1000 linear feet of the Fallen Leaf Road will be reconstructed and repaved.	Fallen Leaf Road is in the Lake Tahoe Basin and is approximately 2 miles west of the City of South Lake Tahoe. Fallen Leaf Road is the primary access point to Fallen Leaf Lake and the Desolation Wilderness. The repairs will be completed at multiple locations on Fallen Leaf Road between State Route 89 and Glen Alpine Way (https://goo.gl/maps/qWNHFwTED342).	07/2017	10/2017	08	10
El Dorado County	Tahoe Mountain Road - Repairs	Tahoe Mountain Road repairs project consist of replacing approximately one 18" and one 24" corrugated metal pipe (CMP) which are 30 feet long with two 24" High Density Polyethylene (HDPE) pipes of similar length. The existing CMPs on Tahoe Mountain Road are undersized per current County standards and are failing as a result of the 2017 winter storms. One of the culverts has begun to fail on top impacting the existing roadway. In addition to replacing the culverts, flared end sections will be added to the inlet and outlets to increase flow efficiencies through the culverts. During the 2017 winter storms flows overwhelmed the existing inlets sending high flows down Tahoe Mountain Road causing further damage to the roadway and shoulders.	Tahoe Mountain Road is in the Lake Tahoe Basin approximately 2.5 miles west of the City of South Lake Tahoe. Tahoe Mountain Road is a secondary access point to Fallen Leaf Road as well as to Angora Lakes. The location of the repair is at the intersection of Tahoe Mountain Road with Angora Ridge Road (https://goo.gl/maps/WrSSNYLoBh72)	07/2017	10/2017	08	10
El Dorado County	Mewuk Drive - Repairs	Mewuk Drive was damaged during the 2017 severe winter storms when high surface and subsurface flows saturated the base section and subgrade of the road causing large scale sinkholes and roadway failures to occur. The Mewuk Drive repair consists of grinding out approximately 1,300 square feet of asphalt concrete (AC) to a depth of 3 inches, repairing the subgrade in the area of the failure, and paving back 3 inches with ½ inch AC mix. Crews will clean the existing ditch along the north side of Mewuk Drive to keep flows from negatively impacting the roadway during times of high runoff.	Mewuk Drive is in the Lake Tahoe Basin, located off of South Upper Truckee, approximately 4.5 miles south of the City of South Lake Tahoe. (https://goo.gl/maps/DkpJ1aF5gCm)	07/2017	10/2017	08	10

El Dorado County	Carson Road - Repairs	Carson Road repair consists of installing 150 feet of 24" HDPE (High-Density Polyethylene) plastic culvert pipe. HDPE has a greater life span than conventional metal pipe. The original 24" metal culvert failed in the beginning of 2017 and caused a sinkhole on the exhaust end of the culvert; if this culvert is not repaired, the sinkhole could potentially become larger and move into the roadway. After installing the culvert, 200 feet of roadway will be repaved and restriped above the new culvert to match existing roadway.	Carson Road culvert replacement is located .80 miles East of Schnell School Road and .50 miles West of Jacquier Road in Camino, California. https://www.google.com/maps/@38.7429941,-120.7682552,3a,75y,65.7h,70.02t/data=!3m6!1e1!3m4!1s9oByDpMuAl_FQnbG77d-Vw12e0l713312l8i6656	07/2017	10/2017	10	15
